Verified and Released On

05th April 2022, 06th April 2022

jectives and Steps

OVERVIEW & PURPOSE

This feature facilitates the user to upload a csv file by clicking on a Icon "File Upload"

Wireless Form - File Upload

- Create a template, give a valid form name and select the allowed role from dropdown.Click Create New Form.
- Drop the single line text.
- Here the user will have a single line field, give a name/label and description
- Set the field properties for the field/table as Hidden
- Set the field properties for the field/table as Default and give the Default value as "tbl_WF_File_Upload_Test1_temp".
- Move to Preview,"Save New form".

File Uploaded		

Conditions while uploading the file

- This functionality supports only .csv files.
- Csv file header name should be the same as the table column names.
- If the column name does not match with Database's header, then it should give the error message "Table/Columns does not exist".

Tasks Completed

File Upload

Platforms Covered
